

LaSalle College

ACCOUNTING AND MANAGEMENT TECHNOLOGY

**DEC DIPLOMA OF COLLEGE STUDIES
DAY | 6 SEMESTERS**

410.B0

The Accounting and Management Technology program (DEC) trains students in various aspects of management, including supplies, sales, accounting, finance, market development, international commercial transactions, and supervision of personnel.

Knowledge of these concepts provides students with the skills to participate fully in the accounting cycle and provide technical support in the computer-assisted management of a business. In addition, the content of this program provides a concrete perspective of business realities, due to careful study and comprehension of the parameters affecting management and accounting.

Graduates of this program will have a comprehensive understanding of techniques that will be valuable assets in various types of businesses.

Do you enjoy numbers, calculations and Information technologies? If so, the Accounting and Management Technology program (DEC) is for you.

PROGRAM OBJECTIVES

The Accounting and Management Technology program (DEC) is geared towards developing versatile technicians capable of intervening at any stage in the accounting cycle and providing technical support to businesses' computerized management.

CAREER PROSPECTS

- Accounting services
- Retail sales or manufacturing: cost, overhead and stock management
- Financial evaluation of projects
- Business development and consultation
- Businesses in economic sectors
